Emerge yourself in the world of Grayscale Coloring ... Grayscale coloring is fast becoming the favorite way to color. With true to life images, high-or-lowlighted in all the shaded or non-shaded areas, and no restraining outlines, grayscale coloring allows the colorists of today to produce realistic, beautiful pieces of artwork ready for display. All of the designs in this book have been specially selected with grayscale colorists in mind, no matter their ability. To create true-life masterpieces, it's recommended to use colors that match the shaded areas in depth—dark colors for the darker tones, lighter colors for the lighter tones, and medium shades for the tones in between. Beautiful Flowers: Grayscale Coloring Book Journal contains a coloring page and journal page for every week of the year, allowing you to document your thoughts while fulfilling your creative needs – the perfect combination. Give it a try: Set their petals

aglow, animate their foliage, and bring these beautiful flowers to life.
