It was so beautiful and beautifully printed, it set a high standard for grayscale coloring books. I have purchased a number of other grayscale books but none have approached the high quality of Ms. Stocker's book until now. Of course, this is the second book in her series and it is as gorgeous as the first book. Where her first book focused on animals, in "Beautiful Nature", Ms. Stocker has turned her attention to flowers, plants, and landscapes. I was so very happy to see succulents included as well as some of my favorite flowers (roses, peonies, hydrangea, orchids, and the list simply goes on and on.) The landscapes and plant studies are equally beautiful and will be lovely to color. Since my first venture into coloring grayscale, I have expanded my skills to include markers as well as colored pencils. I find that both work well with this

book. I like to use markers to put a color foundation down and then to add shading and blending with my colored pencils. Essentially, coloring with soft pencils in this book is simple – light colors for light areas, medium for medium, and dark for dark areas. You color the light areas first, then the dark areas. Finally, you come through with the medium colors and blend the picture together. I suggest that you have a blending medium (such as a pencil) at hand when working with this coloring book. This is what I experienced while coloring in this book and testing the paper with my coloring medium. In the comments section below, I will list the medium I used for testing and which I usually use for coloring all of my projects.

48 Beautiful Nature grayscale designs with plants, flowers and landscapes Printed on one side of page Paper is heavyweight, acid-free, slightly rough, white and perforated Pages are water-marked on the back with an area for you to sign your projects Alcohol-based markers bleed through the paper readily Water-based markers bleed through in tiny spots with the exception of my Tombows brush end markers which did not bleed through in my tests. Gel pens and India ink pens do not bleed through. Colored pencils work remarkably well with this paper. I could lay down great color, layer, and blend equally well with both wax and oil based pencils. I did find that soft lead pencils were somewhat easier to work with as they blend more readily. If you use markers, I suggest that you either remove the pages from the book to color or use a blotter page below your working page to keep ink from seeping through to the page below. I use card stock but a couple of sheets of heavyweight paper work just as well.

By Customer Beautiful Nature is just the best follow-on from Nicole Stockers first book, Beautiful Creatures. The paper is again of the highest quality and my pencils have a veritable love affair with the pictures. This book contains the most interesting grayscale nature photographs just ripe to be brought to life - everything from succulents along with sea landscapes to mountains flowers - something for everyone. If you purchase this book (and/or its predecessor) you will not be disappointed.

Grayscale is a type of coloring, typically using colored pencils or pastels to fill in color into what appear to be black and white photos. The shades of gray help you determine where your lighter and darker shades go and if you follow those then your picture should come out looking as if it was an actual photograph or painting. This sounds so easy. It isn't. It does take time and patience and you may become frustrated with your first one or two but the end product is so worth it!!! And this book is absolute perfection. Nicole has used heavy paper, printed on one side only with a lovely border around the pictures so that you aren't climbing right up on the binding of the book when you are coloring. Additionally, there are pictures for every skill level from the basic beginner (me) to the ultimate artist (I will do the landscape someday) There is also a great page on Facebook which is run by this author where there are helpful hints and other artists that are more than willing to offer assistance and encouragement.

Pros: Heavy paper with a nice feel Detailed, well designed photos for every level Support for beginners or anyone needing the extra help Long term entertainment without becoming bored (oh look...another butterfly or mandela) Cons: A bit intimidating at first but take baby steps and it will be ok No clue how long until her next book. These are self published and done beautifully. The pride of ownership shines through in this book. I actually had Beautiful Animals before and pre-ordered this book as soon as it became available. It was well worth the wait.

erNicole has a knack of selecting the most beautiful photos that lure you in. Don't be overwhelmed when you look at them. It really is very soothing and rewarding to colour these photos...A colourer's dream really! Single-sided images on top quality paper, that don't run into the spine and are perforated for easy removal. -- Colouring Book s with PrueAs soon as I opened the box in which it was shipped, I knew I was holding a product of high quality. The binding and cover of the book are superb, and so is the paper quality...regardless of media and skill level, this book will accommodate. -- A Heep of Everything BlogI could colour in this book for hours. Can't conclude anything other than that this book is a real asset to the colour world. A nice book for starting colourists as well as for the more advanced. -- Volwassenen Kleuren OokThe photographs are all of high quality printing and are just the right shade of gray to colour over colour lightly and let the shading show through or add deeper colour and enhance the shadows, it is up to you and this book allows for both. --Creative Colouring with HazelAbout the AuthorAs a young girl, Nicole was enchanted by a black and white photograph hanging in her parents summer cabin, wishing she could bring it to life with color. An artist at heart, Nicole imagined a collection of coloring books filled with inspiring, carefully curated photographs. Following the beloved Beautiful Creatures, Beautiful Nature is the second in her series of elegant grayscale coloring books. A mother of two young children, Nicole treasures any moment to lose herself in color and creation in her Vancouver home.
