If you're looking for a challenging book with many different designs, this isn't for you. But if you are a bee enthusiast (like me), this is perfect! There's a mandala made of bees and beehives. Another with bees and butterflies. Beautiful bees on almost each and every page. The designs are single sided, so you can use markers, if you like. I wish they were also thicker and perforated, but they are not. Despite that, though, I love this book! if you love bees, you will, too!0 of 0 people found the following review helpful. Very fun and relaxingBy MichelleI bought this for my daughter, the bee lover! It has so many cute pictures to color, from honeycomb to flowers and cute bees. what I thought it would do.....lightens the heart and soul, while it eases a stressful mind. Makes you feel like you're sitting in the middle of a flower garden!
