**Andrew, Vietze : Biggest Fish Ever Caught: A Long String of (Mostly) True Stories** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Biggest Fish Ever Caught: A Long String of (Mostly) True Stories:

The Biggest Fish Ever Caught will tell the tales behind the International Game Fishing Association's record-holding fish, including where they were bagged, what lines/lures the anglers used, and other tips and tricks. The dozen stories

here are filled with amazing action and intriguing characters. They'll take you to lakes, streams, and oceans around the world and explore catch and release vs blood sport fishing, stocking and bioengineering, conservation and controversy. All the while revealing the sorts of secrets fishermen don't usually like to share.

Fishermen who strive for world angling records are of a strange and singular breed: part athlete, part artist, part predator, part mad scientist and totally obsessed. In this entertaining and exciting book, author Andrew Vietze tells the stories of over a dozen modern-day Ahab's for whom landing the largest specimen of a particular species everything from piranhas to largemouth bass to hammerhead sharks looms larger than Mount Everest or the Nobel Prize. Paul Guernsey, author of *Beyond Catch Release: Exploring the Future of Fly Fishing*, and former editor of *Fly Rod Reel*
