Gorgeous Artwork...By Cindy Butler Summary: "Birdtopia" contains 75 colorable pages, 3 pages of introductory material, and a 5 page index in the back. It measures 9.25 by 12.25 inches and is sewn into a matte finish cover with foil accents. Featuring birds and botanicals, this book is appropriate for adult colorists on all skill levels. Paper: The paper in this book is cream colored and about twice the thickness of standard copy weight. All pages are double sided and non-perforated. Dry mediums are okay to use, but wet products may bleed through and ruin the backside of your picture. As always, be sure to place several sheets of blotter paper under your page to prevent any color transfer. Artwork: As the title suggests, "Birdtopia" features a wide variety of avian life- as well as woodland creatures and botanicals. Inside you'll see hummingbirds, eagles, sparrows,

foxes, gazelles, deer, and more. Some of the pages feature a single image, while others include a full background and foreground. There are 5 pages of artwork that have been mostly pre-colored, and a few single colored elements scattered throughout the rest of the book. There is a fairly even split between double and single page images, and there is a bit of grayscale included as well. Much of the artwork does continue into the binding, so removing pages isn't advisable. Detail level is fairly high and picture completion time should range from 2-10 hours(may be slightly different for each individual). Overall, this is a stunning book with beautifully done artwork. It would be best suited for chalk/pencil colorists who enjoy vintage/nature inspired imagery.26 of 26 people found the following review helpful. Love this bookBy Laura NelsonI love this book, beautiful and fun to color. If you like flowers and birds this is perfect. The layouts are gorgeous. If you are looking to learn about birds this is a great one. If you want to improve your coloring skills this book will improve your coloring skills. Daisy Fletcher creates her illustrations in such a way that you can get a finished look instead of the typical cartoon style of many color books. Daisy also offers subtle hints to help you with depth and shading resulting in a superior more polished creation. Daisy also created a "key" at the back of the book to educate what birds she has offered to color. A few minutes perusing Google is all I needed for guidance pertains to the birds colours and habits. The only cons to this book are the pages are 2 sided.3 of 3 people found the following review helpful. DisappointedBy jkembreceived on time. Beautiful book, thick pages, now the bad. There are pics. on front and back so you cant use all pages for display, has beautiful illustrations in color. Its more of a picture book instead of coloring book. Wish I could find another book simmlar to this. The paper quality but with perforations, and be nice if single pages

Welcome to Birdtopia – a curious black-and-white paradise where birds can be as small as insects and flowers as tall as trees. From tropical blooms to wild woodlands, Birdtopia contains a stunning selection of inquisitive birds from across the world including gentle blue tits and violet-tailed sylphs; majestic peacocks and Oriental darters; and striking birds of prey, such as the golden eagle and great gray owl.This beautiful coloring book for all ages contains over 70 pages of wondrous birds living in a world brimming with fantastical flora and fauna. Birdtopia also includes a key of birds and eight pages of lavishly colored illustrations to inspire the reader.The book contains a stunning selection of birds, from gentle hummingbirds and blue tits, to the majestic peacock and Oriental darter, to striking birds of prey, such as the spotted eagle-owl and goshawk.
