Alberta L Hutchinson : Mandala Design Coloring Book No. 2: 32 New Mandala Designs (Sacred Design Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mandala Design Coloring Book No. 2: 32 New Mandala Designs (Sacred Design Series):

I have a lot of mandala adult coloring books and this one may be one of my favorites. The designs are always very unique to the mandala style. They never look like they have been computer generated. The quality of the paper is good and the pages are one-sided. The only thing

that could make it perfect would be if the pages were perforated. That being said, this is a must-buy for any mandala enthusiast. 1 of 1 people found the following review helpful. I Love This Author's Designs By D. L. Johnson I originally bought my first Mandala books several years ago for my mother after she had a stroke to help reduce her stress. She needed some kind of therapy but wasn't doing well with anything that was coming her way so I thought something creative might help her recovery, as she is a very creative person. She didn't take to it but I sure did. One of my first books was the Mystical Mandala Coloring book by this author. It is my favorite and in fact, I just recently bought it again; no reason not to color them all over again and create something new! I've bought many different mandala books since and I've even tried some books that are designs, yet not specifically mandala designs. I have discovered that I definitely prefer the mandala designs, as they really are the best for me for relaxation and focus. With all of the other books I've tried, mandala or not, I've never found another author that I prefer so when I saw these (I bought all three books in the series so I will be posting this review to all three of the books as well), I didn't think twice about buying them, even though I already have enough books to last me years of coloring. They do not disappoint. They are just as good as the Mystical Mandala Coloring book. The main difference between these books and the Mystical Mandalas is that on each page, there is a "design number plaque" (my description of it). You can color these as well. I'm not sure whether I like them or not yet but I've been coloring them and they do look nice below the design; kind of a finishing effect. If you display your completed designs, you can decide whether you want to keep that or not as there is ample space between the design and the "plaque" to remove it if you wish. I color for my well-being and do not display them so there is no issue for me. In a nutshell, I have bought many different authors and have not found better designs; they just look better when they're done. I think that is in part due to the bolder lines that the designs are made with. Coloring is always thought to be for children but mandalas are for everyone. You will feel much better for having done them; and the beauty is that you are in charge. Use pencils, crayons, markers, paint...whatever you choose. With these three books, the designs are only located on one side of the page so that you can cut it out if you choose to use markers or paint so you can keep the colors from bleeding through the paper to your other designs. The Mystical Mandala Coloring Book is two-sided. I use colored pencils so I do not have an issue. I hope this helps. Enjoy! 1 of 1 people found the following review helpful. Nice variety of mandalas By Melissa Nice variety of mandalas. Detail varies. Best with colored pencils or markers. No repeats throughout the book but there are a couple mandalas that are also in the Mystical Mandalas book. This is fine with me, it gives me a chance to color them differently. Mandalas range from flower designs, animals and shapes. Fun to color, relaxing.
