There are different sections ready for pencils, gel pens. Some are very detailed and so much fun, others are lighter and quicker. At the end the author has started some, and prepped them for the colorist to finish. This is the best part of the book, it is so much fun to be able to use your own imagination to complete the pages, then color them. I highly recommend this book to a wide range of coloring enthusiasts. One page to a picture, paper is a good weight.3 of 4 people found the following review helpful.
