There are 50 different designs, each with its own cute big-eyed girl. Some of the girls reflect fantasy and some are just cute girls. Each and every one of them is a fantastic opportunity to play with color and to style the design your own special way. I believe this is the first time Hannah Lynn has had a book of designs available in book form. The others that I have were purchased directly and were not books. This grouping is the top 50 fan favorites – so the

best of the best (at least thus far!) At the front of the book, there are thumbnails that show you the pictures in order and also what their names are. I think this is a great way of doing a table of contents and I really appreciate that the names aren't printed on the design page. If I choose to put them there, this will give me an opportunity to do it my way. The book is printed on one side of thin but nice grade white paper. The pages are not perforated but the artist has put a double frame around each design with enough room so you can cut a page out without damaging the design. The binding is glued rather than sewn and I was able to break the spine enough to get the book to lay fairly flat to make coloring while leaving the page in the book a little easier. All of my markers bled through the paper. All of my gel pens left a shadow on the backside of the page. My coloring pencils worked really well with this paper as it is nicer than basic grade. If you want to use markers or gel pens, I suggest putting a heavyweight paper behind the page you are working on to keep the ink from seeping further into the book. As the back of the page is blank, you won't be ruining another design.

The design in this coloring book are wonderful, there is not one that I want enjoy coloring. I love every big eyed girls, they are so much fun to color. You will find fifty beautiful big eyed girl in this coloring book, each one only on one side of the page. I love that about this book. This is a great coloring book for teenagers and adults alike. I would not put this in the hands of anyone younger the design are just to nice for kids to squabble in. Even though I love every design in this coloring book, they are so nice but, I just can't give this coloring book five stars review because of the very poor quality of paper used to make this book. The paper is so thin you can see the next design under the one you are working on. I used coloring pencil, gel pens to color in this book with a thick cardstock between each page to protect the next design. I would not use markers because of the thin paper. The paper barely holds up under the use of gel pens, it's look like to much water paint was used. Great design but bad paper. I recommend this coloring book because I love the design. Just wish they used better paper.

And yes we adults are entitled to sit and fill our lives with color and no experience necessary :) The hardest thing is choosing which page to start first.
