More Forbidden Knowledge: 101 new things NOT everyone should know how to do by Matt Forbeck has written another interesting and fun book to read on the many usual things you may or may not know about.I bought this used book through Market and since I always read a book from cover to cover, I discovered 8 pages had been (21 to 28, which included information on Pull off a short-change, scam, Get away with speeding, Beat a traffic ticket and Lie effectively) taken out of this book. Nevertheless, the rest of the book had all the other topics mentioned in the table of contents.Some of

the interesting subjects in this book includes the following: How to kill a vampire, Defuse a nuclear bomb, Get elected effortlessly, Water board a terrorist, Survive getting shot, Talk like a pirate, Destroy a political opponent, Run a Nigerian E-Mail scam, Knock someone out, Lie in your car, Jump from an airplane, Practice Gun-Fu, Find a G-spot, Work as a drug mule, Write an erotic novel, Buy a gun, Make a shiv, Become a vigilante, Become a mercenary, Become a prophet, Survive a disaster, Travel through time and Take a punch. In conclusion, if you enjoy reading about unusual and strange things and desire to have a good laugh at the same time, you may want to check out this book. Rating: 4 Stars. Joseph J. Truncale (Author: 0 of 0 people found the following review helpful. CRAP CRAP CRAP) By Harry Beck total waste of time, how win an election.....cheat, yup along with "get your friends to vote for you" idiotic and dishonest, don't waste your time or money on this bucket of fecal matter! 4 of 4 people found the following review helpful. meh) By D. A. Murray The book says it shows how to defuse a nuclear bomb but instead of doing any research into the process with various diagrams or configurations it merely says -- "remove the detonator" and in the alternative "dismantle the bomb. ... remove the plutonium" Like that's helpful. I realize I'm unlikely to need it... but I was expecting a bit more tech. You remember "Worst Case Scenario?" That one was well researched with useful memorable strategies. This book seems like it is intended to entertain low threshold comics, and not much else. I'm sorry I bought it at \$0.01 + sh.

Adrenaline junkies took to the first edition like a Molotov cocktail to an empty car, and now were back with the eyebrow singeing, nerve-shaking, possible assault-charge causing, second round of forbidden knowledge. Where its predecessor pushed the limits and put the pedal to the metal, this followup explodes through boundaries and sets the reader in a tailspin of danger, temptation, and fun. Inside this edgy four-color self-destruction manual, you will learn how to: Become a mercenary; Amputate a limb; Summon a demon; Pass a drug test; Kite checks; and more. Certain to cause some laughs, scrapes, burns, and scarring emotional and physical this book packs twice the punch, kick, and fun.
