**Jim Becker, Andy Mayer : Mouse House: 5 easy to build homes for your computer mouse** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mouse House: 5 easy to build homes for your computer mouse:

They go together perfectly, even if you aren't big on following directions. Pieces are printed on both sides so you can't make a mistake. Tabs fit perfectly into slots, score lines make folding a breeze and the finished buildings look pretty cool. Rest assured, there's no running water and it's a bit hard to get fire insurance on paper houses. You'll still be living better than your mouse. A fun gift and the houses come out looking quite swank! 0 of 0 people found the following review helpful. Everything a mouse could wish for By A Customer Very clever idea. Excellent graphics and easy-to-follow directions. Makes a great gift for that special computer person. And, for all the Dave Barry fans, this is

just not a "guy thing." It's a definite buy

Mouse House includes easy-to-follow instructions for making five unique, worldly, impressive residences where a mouse can check in after a hard day of roaming the far reaches of the electronic frontier.
