Irwin Katz : The Master Book of Specific Medical Terms Redefined before purchasing it in order to gage whether or not it would be worth my time, and all praised The Master Book of Specific Medical Terms Redefined:

Read the 120 basic medical terms redefined and laugh 'til it hurts. Then read the intermediate and advanced terms, and laugh some more. Think you can do better? We bet you can! (Let us hear from you . . .)

About the Author The Master Book of Specific Medical Terms Redefined was written by Irwin Katz, Irving Levine, Walter Schwartz and Lester Segarnick, four senior citizens who got together at least once a week over a period of about two years and put together the 360 medical terms which we entitled "The Master Book of Specific Medical Terms Redefined." We trust that you will enjoy reading what we wrote as much as we enjoyed writing it!
