**Dr. Science, Rodney : The Official Dr. Science Big Book of Science (Simplified)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Official Dr. Science Big Book of Science (Simplified):

1 of 1 people found the following review helpful. Should Be Compulsory Reading By Professor Jiu Jitsu This is the finest scholarly work on the topic of science EVER WRITTEN! If you have not read it, you must. If you don't think you must, then you do not deserve to wear quality footwear! Resign yourself to the fact that Doctor Science knows more than you, but you can make a SMALL dent in your ignorance by reading this book. As the book says, there is a narrow line between ignorance and arrogance. Doctor Science has helped me erase that line in my life! YOU SHOULD TOO!!!!!! 0 of 0 people found the following review helpful. I LOVE THIS BOOK By Miss McKinley I can't adequately explain why Dan Coffey's Dr. Science material cracks me up so much, but this book makes me laugh out loud even when I read sections a second and third time. His straight-faced and totally sideways explanations of all things mundane and scientific are incredibly goofy and witty. Like Woody Allen's early short stories - just SO weird and smart. 0 of 0 people found the following review helpful. Intelligent, absurd, and funny... By Morty Sklar I knew these guys in Iowa City in the 1970s—always creative and absurd. On the one level, presenting information in a convincing style even if it didn't make sense, and on the other hand outright ridiculous, like saying, "Hi, I'm Dr. Science, I know more that you do—I have a Master's Degree—in SCIENCE!"

## The Official Dr. Science Big Book of Science (Simplified)

From School Library Journal YA As an adjunct to their popular radio show, Dr. Science and Rodney have produced a book. These two members of the Duck's Breath Mystery Theater have given pseudoscience a new twist. Questions, fabricated or sent in by listeners, are answered. Thumbnail sketches of the great: "If Plato were alive today he would be Phil Donahue" and other subjects such as the universe, light, electricity, and evolution are the basis for readers' education. Introductory material includes a disclaimer statement, bibliographic information on Dr. Science and Rodney, and notes "To the Teacher" ("Teaching science is no occupation for a grown person"). Supplementary material provides an appendix of other miscellaneous ramblings and a glossary of laughable definitions. Students can employ this book to have a zany scientific adventure, use their imagination, and accept the challenge of living. Anne Paget, Episcopal High School, Bellaire, Tex.
