Characteristic (Humor Research, 3) (Ergänzungsbande Zum Reallexikon der Germanischen Altertumsku):

This volume brings together the current approaches to the definition and measurement of the sense of humor and its components. It provides both an overview of historic approaches and a compendium of current humor inventories and humor traits that have been studied. Presenting the only available overview and analysis of this significant facet of human behavior, this volume will interest researchers from the fields of humor and personality studies as well as those interested in the clinical or abstract implications of the subject.
