I like them, as long as they don't bite me, and I enjoy the occasional walk on a well-beaten path on a very gentle animal. But I have never - and most likely will never - train, show, or own a horse or pony. Nonetheless, I loved this book set. It was utterly charming and hilarious. The humor was sharper than I expected; brilliant for adults, teens and children! There are some cartoons which may not be considered PC, like those related to fox-hunting - these were drawn in the 1950's or 60's I think. The drawings are brilliant, simply brilliant. While the horses are cartoons, their faces are utterly alive with expression! All of the animals and humans are so `real' in a comically unreal way! This set is out of print and expensive, so I'd recommend searching for the titles separately or looking around a little. A MUST for horse lovers (who do you think recommended this to me?) and anyone else who wants to have a good, happy laugh!1 of 1 people found the following review helpful. then lost it - was so pleased to find a complete boxes
